THE COMPANY

Morison Engineering Company is a leading supplier of engineering products in this region. In 1986 the Company acquired “Atlas Fire Security” and other business assets from J L Morison Son & Jones (Kenya) Ltd. Atlas Fire Security has been in existence for nearly 40 years and is synonymous with fire fighting equipment in many Kenyan businesses and residences. However the company has continuously transformed in order to trade in a wide range of engineering products and services as detailed in this profile below.

Morison Engineering is Kenyan based and is a wholly owned subsidiary of Amedo Madison Holdings Ltd. The other subsidiaries of AMH are Madison Insurance Company Kenya Ltd and Amedo Centres Kenya Ltd. The current directors are Mr. S. G. Ngaruiya, Mr. J. M. Wainaina, Dr. E. Mwarania, and they are all Kenyans. The company headquarters is located in Nairobi’s industrial area and has a branch in Mombasa.

The company distributes high quality equipment from a number of industry leading companies from around the world. Supported with a well equipped office facilities, repair workshop and mobile service team, the company business activities are focussed on 8 principal product sectors – fire fighting equipment, generators, air conditioners, fire alarm & suppression systems, plumbing & drainage Mechanical Engineering services Electrical Engineering and field service.

Morison Engineering full range of fire fighting products are manufactured to international standards such as British standards (BS); European standards (EN); Australian standards (AS); Singapore standards (PSB); Underwriter Laboratories standards (UL); and Kenya Bureau of Standards (KEBS). Our team of Engineers, professionals and skilled technicians are well experienced in interpreting specifications and requirements of enforcement authorities. With the understanding of these requirements, our engineers and technicians will support installations as well as provide product training and efficient maintenance to ensure optimum performance of the systems the company deals in.

1. FIRE FIGHTING EQUIPMENT

Morison Engineering recognises that the provision of safety and comfort in any buildings is paramount. The distribution of fire fighting equipment is Morison Engineering principal activity for more than 40 years now. The range of fire fighting equipment provided by the Company includes portable fire extinguishers, hose reels, hydrants, sprinklers, and fire blankets etc.

We also supply, install and service fire fighting equipment to a wide range clientele such as WFP, Standard Chartered, Barclays Bank etc. We carefully source our equipment from reputable international suppliers including trademark like **SRI** and **NEWAGE**. We are been widely supplied our products to most banks, supermarket chains, oil companies, manufacturing companies, Hotels, Hospitals etc as detailed in our customer profile below. Morison Engineering is registered as Trainers with the **Directorate of Occupational Health Safety Service (DOHSS)**, which is a department in Ministry of Labour, KENYA.

2. GENERATORS

Morison Engineering key business initiative is establishment of a Generator Division, which is aimed at complimenting the other company products. A dedicated business unit has been formed and a wide product range is offered including models like **CUMMINS** and **PERKINS** engines models. The units are sourced from world leading supplier's countries like the United Kingdom and the Far East countries. Our products range from 1kVA to 1500kVA power generation units.

We supply, install, service and maintain power generation systems in commercial buildings, factories, residential homes, offices, hotels and other related areas. The combination of quality products supported by trained generator technicians and the resources at Morison Engineering provides required uninterrupted power supply to the end-user.

3. AIR-CONDITIONERS

The Air- Conditioning Division is also a very important area of Morison Engineering business. A dedicated business unit has been formed and a wide product range is offered including models like **CHIGO, LG, and CARRIER** among other reputable models are on offer at the company. The units are sourced from world leading supplier's countries like Australia, Korea, and USA etc.

We supply, install, service and maintain air-conditioning and refrigeration systems and facilities in offices, computer rooms, cold stores and related areas. The combination of quality products supported by trained air-conditioners technicians and the resources at Morison Engineering provides the comfort drawn from the air conditioning products.

4. FIRE ALARM & SUPPRESSION SYSTEMS

Morison Engineering supplies, installs and commissions fire alarm systems and we are the appointed distributors of **ZETA Alarm Equipments (UK)** in Kenya. This includes a wide range from the basic panel to the large network based systems controlled by a ZETA configuration.

The company sales, installation and service technicians have been factory trained to give our customers the best possible product and the expertise to back up the systems. These include Addressable & Conventional fire alarm systems.

For the fire suppression systems Morison Engineering is fully authorised to trade in **KIDDE** products sourced from **ANGUS FIRE** Company in the UK in this region. This is the manufacturer of the **FM200** system that we install in various buildings in the region as detailed in our customer profile below. In the protection of certain types of buildings and equipment, FM200 represents one of the best fire suppression systems available in the market today. Most installations we have done include institutions like the banks, government agencies, commercial buildings, factories to name just a few.

5. FIELD SERVICE

The service fire fighting equipment is Morison Engineering main activity and it offers the widest range of service solutions in the region. Most of our products are sourced from a number of world leading manufacturers including **SRI and Ningbo**. The service solutions also include all the other products of the company like Generators, Air Conditioners and the Fire Alarm system.

Product support is a priority and together with extensive product stocks all models offered are backed with detailed reference literature, spare parts, service facilities, and importantly, expert selection advice from a team of trained field technicians.

Also available is a wide range of accessories including corresponding electrical accessories, specialized fittings, control equipment, plus much more to ensure that all necessary hardware is available for an installation. Morison Engineering is committed to providing an unparalleled service projected to be offered on time all the time.

6. PLUMBING AND DRAINAGE

Morison Engineering is registered with the Ministry of Public Works and Housing, also with local authorities as plumbing and drain-laying contractors. We carry out general plumbing works in office blocks, residential, factory and related buildings including sanitary ware installations. Most of our plumbing materials are source from local suppliers hence the delivery and execution period are always efficient. With a dedicated team of plumbers the company has the capability of executing a given scope of plumbing assignment just as instructed by the Engineering consultant. The major plumbing job that the company has executed so far include projects at the Central Bank of Kenya, The Ministry of Lands and Housing (Ardhi Hse), Karirana Tea, The Co-operative Bank among others

7. MECHANICAL ENGINEERING WORKS

We carry out general mechanical works, fabrication, repairs and new installations in office blocks, residences, factories and industrial premises. We have a well established department to handle any kind of job coupled with sound financial back up and efficiency. Supply is both local and international. Major jobs we have executed so far include Bamburi Cement Mombasa and Nairobi, Cooperative Bank among others.

8. ELECTRICAL ENGINEERING WORKS

Morison Engineering Ltd is registered with Electrical Regulatory Commission as a Class A Contractor. We have a wealth of experience in all aspects of electrical engineering, running across board from residential, commercial to large industrial set ups.

We have a team of experienced and well trained engineers and technicians. Our strength lies in effective and efficient delivery of service.

Some of our clients are shown in subsequent pages of this profile.

Company's management team, key principals and personnel

1. Name: **Robert M. Mutugi** - B.Com, MBA (Strategic Management)
Title: **General Manager**
Email: morison@morison.co.ke; generalmanager@morison.co.ke
Mobile: 0731 849 112
2. Name: **Humphrey M. Muchoki (Higher National Diploma in Mechanical Engineering (Plant Option))**
Title : **Technical Sales Manager**
Email: morison@morison.co.ke; tsm@morison.co.ke
Mobile: 0720 322 377
3. Name: **Martin K. Munene (Diploma- Mechanical Eng.)**
Title: **Branch Manager - Mombasa**
Email: morison@morison.co.ke; bmanager.msa@morison.co.ke
Tel: 254 41 222 4034 Mobile : 0720 532 192
4. Name: **Joash O. Juma (Diploma - Mechanical Engineering)**
Title: **Projects & Service Supervisor**
Email: morison@morison.co.ke; service@morison.co.ke
Mobile: 0723 932 885
5. Name: **Stephen Mutisya (Diploma – Mechanical Engineering)**
Title : **Service Supervisor**
Email: morison@morison.co.ke; projectsupervisor@morison.co.ke
Mobile: 0716 700 085
6. Name: **Tom Oyie (Diploma – Mechanical Engineering)**;
Title : **Projects Supervisor**
Email: morison@morison.co.ke;
Mobile: 0734 560 083

We have a team of eighteen (18) Service Technicians with training in both electrical and Mechanical engineering.

We also have other staff members in various other departments of the organization namely Finance /Accounts, Sales, Marketing, Procurement and Administration.
